

Energy Savings Program Agreement

Thank you for investing in the right choice for comfort. Maintaining your home heating and air conditioning system from Randerson Heating and Cooling, will give you many years of energy efficiency and enjoyment. Homeowners appreciate the service and savings that come with the Randerson Energy Savings Program. Keeping your air clean, your home healthy and your indoor air system running efficiently, can help you save energy minimizing your home heating and cooling bills over the years.

Historically, we've found that when a service call has been needed the savings to the homeowner could be \$100 or more for an emergency service call. Having us visit your home twice a year to inspect, clean and adjust your furnace and air conditioning system keeps your manufacturer's warranty in good standing as part of your annual maintenance program.

A typical Energy Savings Program for a gas furnace or boiler and your air conditioning system with a 1" filter costs the same as two home tune and check visits. Plus you get all the additional benefits:

- Save money on all repairs.
- Guaranteed system pricing for tune-ups in spring and fall.
- Lower utility bills from more efficient system operation.
- Extended equipment life.
- Fewer repairs.
- Improved air flow capacity for both heating and cooling.
- Priority service should you ever need immediate service.
- 24 hour emergency service.
- Your ESA agreement is transferable should you ever relocate.
- No after-hours charges.
- Keeps your warranty in good standing through consistent maintenance.
- Peace of mind knowing that Randerson is just one call away should you need help.

Save energy and money now by signing up for Randerson's Energy Savings Program. Contact Randerson Heating and Cooling today for pricing on multi-year discounts, Media Filters, Oil Furnaces and Aprilaire Water Panels.
